PROFILE SUMMARY

Passionate and energetic final-year B-Tech CSE student. Quick to grasp new concepts and apply them effectively. Good Problem-solving and analytical skills, complemented by good teamwork and communication abilities. Seeking opportunities to enhance skills and contribute to impactful projects in the tech industry.

PERSONAL PROJECTS

Botique Management System
Website

- This project operates within a SQL database framework, allowing users to input details through a webpage with the data and stored in the database. CRUD operations are supported, providing a comprehensive set of functionalities. Integration of the frontend and database is facilitated by Python's Flask framework. system.

Accident Detection
CNN

- This aims to quickly clear the accident scenes by enabling faster emergency responses, potentially saving lives, and improving traffic flow. Using machine learning, specifically a CNN based Project.

Crop Advisory System
Website

- This project is developed using HTML, CSS, and JavaScript. It will recommend the best crops under the user given conditions which can be useful for the farmers
