EDUCATION

Bachelor Of Technology

MVGR College of Engineering
2021 - 2025

Intermediate

Sri Chaitanya Junior College
2019 - 2021

Secondary Schooling

Sri Chaitanya Techno School
2018 - 2019

SKILLS

- Python
- C
- Java
- HTML
- CSS
- Java Script
- React JS
- Machine Learning

LANGUAGE

- English
- Telugu

CERTIFICATIONS

- Programing essentials with C
- Programming essentials with Python
- Certification of Traning in C

PROFILE

I am an undergraduate student from MVGR, and a passionate final-year B-Tech CSE student. I am quick to grasp new concepts and apply them effectively.

PROJECTS

Botique Management System

Website

This project operates within a SQL database framework, allowing users to input details through a webpage with the data and stored in the database. CRUD operations are supported, providing a comprehensive set of functionalities. Integration of the frontend and database is facilitated by Python's Flask framework, system.

Accident Detection

Deep Learning

This aims to quickly clear the accident scenes by enabling faster emergency responses, potentially saving lives, and improving traffic flow. Using machine learning, specifically a CNN based Project.

Vehicle Damage Detection and Cost Estimation

Deep Learning

This project is mainly designed to detect the damage severity, location of damage and predicts the estimated cost to its repair. Also based on the user input the Insurance premium predictions are done. This uses Deep learning, specifically CNN to detect the damage and Python Flask is used to connect the Models and Front end.

Crop Advisory System

Website

This project is developed using HTML, CSS, and JavaScript. It will recommend the best crops under the user given conditions which can be useful for the farmers
